INTRA-LABORATORY MEMO

Received: August 16, 1973

TO: CHR Records Room
FROM: Jan Lieben, M.D.
SUBJECT: Phone calls and contacts

8-6-73 Called Mr. re MMS letter - don't think we are interested in exhuming my mother, but I'll talk to my brother - (Am going away, will be back in October). My sister, Mrs. of Baltimore drank radium water, she is still alive, check her phone
She is away 'til middle of August.

Also, Mrs. mother's sister(?) also drank radium water.
Her daughter is Mrs. in Frederick, phone (her mother is dead now).

40-015
8-7-73 Re: - please refer to letter from Fitzgerald & Fitzgerald of 8-1-73, called Mr. Fitzgerald, Sr. There are some nephews, Carmel, Calif. 93921, home
office . And a Rochester, New York,

8-7-73 Re: Dr. - old case - called Pa.
The old man is still alive, did not sound very chipper (he is blocking exhumation at age 90).

8-9-73 Re: family. Called for appointment with Mrs. at Fredericksburg(?) re exhumation of Mrs. (see above, 1st item).

8-11-73 Visited Mrs. daughter of Street, Frederick, Md. (phone) to discuss exhumation of her mother sister of Mrs. is the only child, there are no brothers or sisters. She remembers that her mother had at least 1 case of radium water which she had been given by Oscar Coblentz, Sr. She drank it to cure her multiple sclerosis. She died in 1935, the undertaker was Clarence Carty, no longer in business. Etchison is our undertaker who could arrange the exhumation.

Her son, Dr. (M.D.) attended the conversation and both mother and son seemed agreeable and will sign but want to discuss matters first with
Left the form and my card. Dr. would like some literature on the work of M.I.T. to better understand the project. This should be sent to his mother's address above.
